

## Inverter two sets of batteries

### Overview

If you plan to use two inverters simultaneously to power the same appliances, you must choose inverters that can synchronize their outputs. Some off-grid inverters are. If you choose this setup, it can have two reasons: 1. You want to add an inverter to your existing system for more power. 2. You want a more. Connecting two inverters to the same battery is easy. But there are some extra calculations and considerations we need to do.
