

Uninterruptible power supply equipment for the conversation room

Overview

A UPS battery set consists of a set of battery blocks arranged into a single or multiple battery strings. A typical battery block is rated 50Ah 12Vdc. If the inverter section requires a 60Vdc input voltage, then $5 \times 12\text{Vdc}$ battery blocks are required in a single string of batteries where $5 \times 12 = 60$. A UPS external bypass switch allows the UPS system to be safely maintained during a preventative maintenance visit or swapped out without disruption to the. A UPS system has consumable parts and forms part of the critical power path. The device should be regularly inspected and maintained at least once per year.
